

Job Posting

Job Position: MERN Full-Stack Developer

Company Name : CGI

Location: Toronto, ON M5B 2L7•Hybrid work

Full job description :

We are Canada's largest independent information technology services firm, and after 45 years, we're still growing! Join Canada's largest IT Company as a "Full-Stack Developer (MERN)".

We are seeking skilled Full-Stack Developers to join our dynamic Agile team, working within the enterprise environment. This role offers the opportunity to contribute to high-impact projects while collaborating with stakeholders across various levels of the organization.

This role is hybrid and requires you to be in our Downtown Toronto office (250 Yonge Street) 3 times per week - subject to change at any time.

Your future duties and responsibilities

- Develop and maintain scalable, high-performance applications using the MERN (MongoDB, Express, React, Node.js) stack.
- Write clean, efficient, and testable code following best practices.
- Gather and refine technical requirements to meet business objectives.
- Create and maintain comprehensive software documentation.
- Collaborate with Scrum team members to plan sprints, execute project milestones, and proactively escalate issues when needed.
- Lead and guide team members with varying levels of experience, fostering a culture of collaboration and innovation.

Required qualifications to be successful in this role

- 5–7 years of experience as a Full-Stack Developer.
- 3+ years of professional experience with the MERN stack (MongoDB, Express, React, Node.js).
- Proficiency in JavaScript, HTML, CSS, TypeScript, and other web technologies.
- Experience with RESTful APIs and web services.
- Familiarity with version control systems (e.g., Git).
- 3+ years working with microservices architecture.
- 3+ years of hands-on experience in Agile/Scrum environments.
- Strong communication skills with the ability to influence decision-making across stakeholders.
- Proven ability to lead teams, manage differing perspectives, and provide technical guidance.

Excellent organization, planning, and time management skills.

Hiring Manager
CGI
250 Yonge Street
Toronto, ON M5B 2L7

Subject: Regarding - Full-Stack Developer (MERN)

Dear Hiring Manager,

My name is Sumitha Thankachan, and I am an experienced MERN Stack Developer excited to apply for the Full-Stack Developer position at CGI. My experience developing applications for scalability and high-performance has made me eager to provide my MongoDB and Express.js and React and Node.js expertise to your active team structure. I discovered this opening by using CGI's career portal which led me to become interested in the company's dedication to modern innovative technical solutions.

The mission of CGI to deliver advanced software solutions matches perfectly with my dedication to optimize performance while building secure APIs along with scalable systems. My technical experience match with CGI's Agile methodologies and enterprise-level software development shows a positive alignment to my problem-solving mindset. I am eager to join an organization that puts a value on team-based work, technical advancement and ongoing development.

- Five years of experience in MERN-stack development.
- Proficiency in HTML, CSS, JavaScript, and modern front-end frameworks.
- Proficiency in Node.js, Express.js, and MongoDB, integrating with front-end.
- Expertise in authentication systems using JWT and OAuth for secure applications.
- Strong problem-solving and collaboration skills in Agile teams.

I would welcome the opportunity to discuss how my skills and experience align with CGI's goals. Thank you for your time and consideration. Please feel free to contact me at +1 289-547-8701 or sumithathankachan90@gmail.com at your convenience to arrange a discussion.

Sincerely,
Sumitha Thankachan
